

VOICES depends on “Affiliates”, (groups that advocate a position) to provide content for you to consider. Realizing how busy most of us are, VOICES understands that you may not have the time to put forth issues to be considered that will help solve the problems that we face as a country. VOICES informs its members of the position taken by “Affiliates” that the member (you) identifies with.

If there is a group that you belong to that you feel would benefit by becoming a VOICES Affiliate, VOICES will pay you for assistance in recruiting that group. To qualify; you must provide VOICES via email the name and phone number of the person that you speak with concerning the group becoming an Affiliate. If that group becomes an Affiliate, VOICES will pay YOU \$1.00 for each member recruited by that Affiliate during the first six months. The first email received by VOICES concerning recruiting that Affiliate is the ONLY member that will qualify for the referral.

These groups rely on donations from their members to continue to operate. VOICES, in an effort to support these efforts by affiliates pays a referral fee for each member that joins VOICES as a result of having been referred by an Affiliate. In most instances VOICES pays in excess of 25% of our income from each member to a group that the member identifies, in an effort to help them continue advocating for you. Please identify which groups listed below that you belong to, and identify ONE of them as your “PRIME AFFILIATE”. VOICES will then pay the referral fee to that PRIME AFFILIATE when it joins VOICES.

From the founder

I founded VOICES because I, like so many of you, feel that our elected representatives no longer listen to us. I believe that “of the people, by the people and for the people”, means that we are the government; you and I, our neighbors and friends, and people that live in our community. We then elect someone to represent our wishes in a forum such as the House of Representatives, or our state legislature.

Too many of these people promise to represent us, the government of the people, but once elected they think that they are the government. They then represent others; such as “special interest” groups; big business, big labor, and their party bosses. This has occurred because as individuals our voices are not loud enough. VOICES changes that by making our voices collective. When our elected representatives hear us speaking as a group, they will listen.

Please take the time to read “About VOICES”, and our FAQ section. I hope that you will agree that VOICES can you make you heard, again. If so, we will once again be the government; you and I, our neighbors and friends, and people that live in our community. I promise you that VOICES will remain true unto itself; it will not change, it will not be corrupted, it will make you heard as the people.
